The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

Claims 1-30 are rejected under 35 U.S.C. 102(e) as being anticipated by Ylitalo. Exemplary claim 1 is read on Ylitalo as follows: “receiving identification of a desired printing performance” (transmits signals that are used to adjust , see paragraph 0017), “automatically determining which of several different printing parameters of the printing device to adjust to provide the desired printing performance” (printing parameters used for such image or images are then used as a basis for selecting parameters fo use in printing, see 0018) and “adjusting the print parameters of the printing device as necessary to provide the desired printing performance” (on or more of the parameters used in printing the final desired image, see paragraph 0017)
